

Seventh and Eighth Grade Summer Reading 2021

Because it is important to keep learning year round, you will be reading at least **three** age appropriate books over the summer and responding to each with a thoughtful journal reflection of at least **eight** sentences. You may choose either fiction or non-fiction books which appeal to you and which are challenging without being too difficult.

For fiction books, your journal reflections should include your reaction to the book, your thoughts on the book's theme (the author's message about life), and any other thoughts on the book's plot and characters. For non-fiction books, you should write a summary about what you have learned and your reaction to this new knowledge.

Journal reflections may be hand-written or typed and submitted during the first week of school. Your reflections will be worth ten points each and will become your first graded assignment of the new school year. Here are some suggestions for books that you might like. Have fun!

*Books with **more than 400 pages** may count as two books.*

** For those who would like to tackle an ambitious piece of writing, you may substitute an original short story of **1000 - 1600 words** for one of the books and reflections. Your story should have an interesting plot, at least one well-developed character, and a strong theme. Your short story can be submitted during the first week of school.

If you like *Wonder* by R.J. Palacio, try

A Note From Ms. Kopp:

As you are reading these books of choice, be sure to take notes after each concluding chapter on anything you find noteworthy and memorable for you. Manage your time this summer where you have a quiet and safe space to dedicate at least 20 minutes of undisturbed reading at a time. I encourage you to read a physical book or ebook along-side an audiobook version if available. You may read these novels all at once and work on your journal reflections most of summer, or slowly, one chapter a day, complete the reading and then begin writing. I do not advise you to wait until the last minute to quickly read and write. Dedicate time and energy to read and write; devote yourself to this assignment to carefully pour into books and write all your thoughts and feelings while reading. Use this reading and writing as your private time to be alone and to meditate. Practice being still and quiet for just moments out of your summer days; this will assist you into transitioning back into the school year this fall. Take care and I will see you soon! I very much look forward to reading your journals.

Summer Math Work

Dear Middle School Families,

Summer Math work will be posted on Google Classroom, the MS website and emailed home. Students will complete weekly assignments from IXL, Desmos, and/or Delta Math. All IXL assignments will be completed to the second ribbon (usually a SMART score of 81%; 82% if entering 8th grade Algebra). Parents will sign the summer math worksheet after each week's assignments have been completed.

Summer math will be due the first week we return from Summer break.

Please email your child's current math teacher if you have any questions regarding the summer math.

Have a wonderful summer,

The Middle School Team.
