

Summer Reading Project

You will become the director and producer of a movie for a new book. To prepare for the filming you will have to study the story, cast the film and create a trailer to motivate movie goers to see it.

Part 1: Study the Story: Construct the Story Plot Line.

1. You must choose a book of your liking. It should be at your reading level and be a challenge to you.
2. Read the book thoroughly, maybe twice so that you know the story well.
3. Create a story plot line on a poster that include the following:
 - A. The exposition: the setting and list of main characters.
 - B. The Problem: note it at the base of the plot line.
 - C. The rising action events: you should include a minimum of 12.
 - D. The Climatic Event: what event is at the height of the suspense of the story.
 - E. Falling Action Events: a minimum of 4 that spells out the solution.

Make your plot line interesting and colorful. Maybe include some pictures on the open spaces.

Part II: Casting Chart

1. Create a casting chart for your movie.
 - A. List all of the characters in the book.
 - B. Research actors and actresses that you think might be able to play the parts.
 - C. Match the actors and actresses by what roles they have played in past films or on stage.
 - D. On your chart list your title of Casting Chart at the top.
 1. List the roles on the left with a short character sketch for each.
 2. On the right place a picture of your actor or actress.
 3. Create a square box next to each picture - about 3x4 inches.
 - A. Inside the box write your justification for picking that particular actor or actress.
 - B. Do this for all of the main characters- a minimum of 5.

III. The Movie Trailer

- A. Create a trailer to advertise your coming attraction. There are applications on line if you do not know how to go about this.
- B. You may use your family or friends to help you.
- C. Be creative and have fun with it.

Math Summer Work 2021

4th Graders going into 5th Grade

Each week you will need to work on each IXL code for 20-30 minutes and work on multiplication or division facts. To practice your facts, you can use flashcards, workbooks, IXL codes (provided below) or use an online math game. Use the chart below to document your progress on your summer work. If you master any of the required IXL codes, additional codes are provided below to practice skills we have worked on this year. Every week your parents need to check your progress and sign stating you have completed the assignment.
